Assumptions and Notes

- For the purposes of this illustration, costs and charges have been calculated based upon the value of the portfolio at the start of the year, as has the effect of those charges on return. In practice, costs will be incurred throughout the year.
- The value of each trade in the illustration is £5,000. Transaction costs have been applied based on an assumed annual turnover for the portfolio of 6 trades: 6 equities.
- The third-party product costs shown in the illustrations above relate to the underlying financial instruments. These costs and charges are not charged directly to the portfolio, they are applied through a reduction in the overall investment's value. They include annual ongoing charges, transaction and other incidental costs on certain products/ investments.
- The government taxes and duties shown in the illustrations above reflect stamp duty, PTM levy and VAT from the annual management fee which are additional costs of investing.
