

Stockbroking Services: Schedule of Charges

STOCKBROKING AND ACCOUNT CHARGES

	EXECUTION-ONLY SERVICE	DEALING WITH ADVICE SERVICE
	A personal service where you can speak directly to a qualified stockbroker, but all investment decisions are entirely yours and we offer no advice.	As with our Execution-Only Service, this service provides you with personal contact, but in addition it can also be proactive and includes advice on specific stocks and shares.

**For those which can be settled via CREST. CREST is the paperless settlement system for UK and Irish shares and other corporate securities. For overseas shares that cannot be settled by CREST, please contact your local office for confirmation of charges.*

In addition a 'Settlement and Compliance' charge of £15 is added to all transactions (this may be higher for overseas stocks that cannot be settled via CREST).

GOVERNMENT TAXES AND DUTIES

These costs will be shown on your contract note, issued after each transaction.

Stamp Duty: 0.5% on purchases of UK Equities and Preference Shares (Irish Stocks 1%). Please note this is rounded up to the next £5 for some stocks. UK Stamp Duty is not payable for most share purchases on the AIM index and the NEX Exchange. Foreign stocks may also be subject to similar taxes.

Panel of Takeovers and Mergers (PTM) Levy: £1 on all contracts over £10,000 in value.

ILLUSTRATION OF COSTS

Regulation requires us to provide you with this information and we recommend that you read it.

The table below is intended to help you compare the cost of investing in the different types of investment shown. It reflects Redmayne Bentley's standard transaction charges that we make directly and other 'third-party' costs that will be shown on your contract note (e.g. Government Stamp Duty, PTM Levy) these are detailed overleaf. In addition, it shows the typical fund manager charges which will apply if you purchase a collective fund or collective investment product based on average annual costs of the most commonly held unit trusts, OEICs, investment trusts and exchange traded products. These are not charges that Redmayne Bentley applies and we receive no portion of them.

ASSUMPTIONS AND NOTES

Our Dealing with Advice service (which offers ad-hoc advice on transactions), carries an annual charge of £400 + VAT and dealing commission on a £15,000 transaction would be £10 higher than allowed for above. If only one transaction was made in a year, the return would be further reduced from that shown above by 3.3% p.a. This would be a severe reduction and the Dealing with Advice service would not be recommended for someone who did not anticipate a higher level of investment and a greater frequency of trading.

If the investment was made into an ISA an additional annual charge of £60 + VAT would be incurred although this would cover all investments in the ISA. If there were no other investments in the ISA, this would reduce the return further by £72 or 0.48% p.a.

If the investment was made into a Junior ISA (JISA) an additional annual charge of £20 + VAT would be incurred for all investments in the JISA. If there were no other investments in the JISA, this would reduce the return further by £24 or 0.16% p.a.

If the investment was bought as a certificate (rather than held in Nominee) an additional one-off certificate charge of £15 would be incurred. This would reduce the return further by £15 or 0.1% over 1 year and by an average of 0.033% p.a. over 3 years.

To show the costs and charges more clearly we have assumed that fund manager and product provider charges are steady throughout the investment period, and that there is linear investment growth of 5% which is not guaranteed, but enables a realistic rate of return to be shown with the impact of costs and charges. The intention here is simply to show the extent to which charges reduce investment returns. Should any of the variables change, the actual costs and level of return may be higher or lower than stated.

Most of these investments are generally designed to be held for the medium term and the longer you hold them, the smaller the effect of costs becomes (because the costs incurred on acquisition are spread over a longer period).

The third-party product/fund costs reflected in the illustrations above are based on actual costs charged by each category of product e.g. Unit Trusts and Open Ended Investment Companies (OEICs), Investment Trusts, and Exchange Traded Products based on the average annual costs of the most commonly held products/funds.
